- Height: 914 to 2994mm in increments of 40mm

Sysco® is a very solid and multifunctional system. This modular system has numerous dimensions to allow you to utilise all available space, even around pillars, ventilation shafts and other objects. The system provides an economical solution that can be used by multiple users on a frequent basis. All information you need is easily accessible. Whatever filing system you use, Sysco® can be adapted to your needs and wishes. Sysco® is highly suitable for use in offices, archives, repositories, shops and warehouses.

The Sysco® system's unique coating process guarantees one hundred percent coverage of steel for a perfect finish. Sysco® is finished in grey-white RAL 9002 but can also be finished in other colour options, including premium powder-coatings in 10 colours and 9 monoform designs.

The sidewalls are available single closed, flush closed and may be provided with perforations to allow ventilation and hence optimum preservation of your documents.

Sliding doors or roller front doors further protect the system's contents.

The flexibility of the Sysco® system can also be easily adjusted and expanded, and that the racks can be converted into a space-saving mobile system at any time.

To put it simply, Sysco® is a sound investment.
